Since 1999, Bucknell University has been involved in a unique partnership with a resettlement community outside the capital city of Managua, Nicaragua. Participants in the Bucknell Brigade service-learning program help raise funds for a free health clinic in Nueva Vida. Twice per year, members of the Brigade visit Nicaragua to deliver medicine and health supplies, and to assist with other needs of the clinic.

Please consider donating any of the following items from the Bucknell Brigade Wish List for use in the free health clinic in Nicaragua:

### Special/Urgent Needs
- Children’s cough and cold remedies
- Vitamins for adults and children (no “gummy” vitamins)
