**Speaker:** Mr. Steve Narducci

**Title:** 3D Modeling in Engineering and Construction

**Short Description:** Mr. Narducci is a team member of MESH Consulting, an engineering firm specializing in 3D virtual construction modeling projects (used with GPS machine control). MESH Consulting serves as the liaison between the civil design consultants and the site contractors. The presentation will feature examples of how 3D modeling technology is being implemented in today's construction and engineering industries. Specific points to be discussed include the accuracy of 3D modeling and GPS systems will be discussed, and the role that this technology plays in engineering design.
