This travel course is designed for students interested in studying geology through hands-on, experiential learning in an exceptional geologic setting.

Camp, hike, and explore diverse geologic features and landscapes in Death Valley National Park—active faults, alluvial fans, spectacular stratigraphic sections, metamorphic and igneous rocks.

Course is open to students enrolled in any Spring ’09 geology course. Space is limited - enroll soon!

Dates: March 7-14, 2009
Cost - course fee plus meals
Deposits due by October 24, 2008
Interest meeting TBA
