Revised 12.8.21

¹ The requirement to complete two intensive mathematics courses can be met by any course at Bucknell with a MATH prefix, any course that meets the Quantitative Reasoning requirement (designated CCQR), EDUC 362, PSYC 215, a SAT II Level I Assessment with a score of 560 or above, AP math accepted for credit at Bucknell, a college level mathematics course transferred from an accredited college, or a CLEP or distance learning course. CLEP or distance learning can be used to meet the intensive math requirement even if the credit does not transfer to Bucknell. See the Certification Officer or Chair of the Education Department for verification before taking such a course.

² English AP courses accepted for credit at Bucknell can be used to meet this requirement.

³ Courses in this category may or may not meet major requirements for the students selected field of study. Students should consult the appropriate part of the Bucknell Catalog for listings of major requirements.

Recommended Course Sequence for Secondary and K-12 Teaching Certification Programs

Secondary and K-12 certification programs are based on a major in the desired content area. In addition to meeting Bucknell's College Core Curriculum requirements along with requirements for their major, students must plan to take the equivalent of one education course per semester, and to spend one semester in the senior year in student teaching. Some certification areas require specialized content courses or have requirements outside of the major. Please see the specific requirements for your certification area and consult early and often with your education advisor to make sure you are fulfilling all requirements for teaching certification.

Italicized courses are offered only in fall or spring semesters as listed.
