You'll answer the only way you know how.

Years from now,
When you've chased down the twists and turns that led to discovery,
When you've found the direction your life takes,
When you've explored the questions and uncertainties that strengthened your resolve,
And achieved the kind of success that really means something,
Someone will catch you in a moment, look up to you, and ask:

And you'll answer the only way you know how.
By working for it every step of the way

By pouring yourself into every opportunity to prepare and grow.

At Bucknell, our students find their direction and define personal and professional success on their own terms. But first, they explore every possible route — diverse interests, passions and curiosities — and realize the only one that makes sense to them.

Our alumni go on to become artists, authors, Fortune 500 CEOs, entrepreneurs, doctors, directors, lawyers, professors and politicians. But we realized a long time ago that there’s more to making it than how much money you make. At Bucknell, success is measured by where you go and how much it means to you.

It wasn’t about money or who I was going to meet. I had done that. For me, it was all about, ‘What am I going to do to change the world? Whose life am I going to change?’”

In politics, there are winners and losers, but when it comes to water, there cannot be any losers.”

You define success.

Bucknellians are all over the world, creating a vast network ready and willing to help you navigate your career. They’ll retrace their steps back to their alma mater and make sure you find solid footing on your own path — so you can get out there and blaze a trail for someone else to follow.

Marissa Calhoun ’10
English and Women’s & Gender Studies

Marissa climbed the TV newsroom ladder, working at CNN on The Situation Room with Wolf Blitzer, and CBS’ 48 Hours and Person to Person, as well as Katie Couric’s ABC talk show. Then she felt compelled to change direction and joined the staff as a field producer on the Emmy-nominated CNN Heroes.

Instead of focusing on sensationalism, Marissa tells uplifting stories of everyday people who have overcome extraordinary odds. She says the work is more meaningful and inspires her every day to engage with her community.

I had never considered the human impact of agriculture. We’re working on improving a food system that is broken.”

Andrew Chahroul ’06
Environmental Studies

Andrew had an epiphany about changing conventional agriculture during a seminar taught by Ben Marsh, professor of geography and environmental studies. It opened his eyes to new and more sustainable uses for our landscape.

Andrew now manages a nonprofit farm and orchard in the San Francisco Bay Area where he supplies local farm-to-table restaurants, provides produce for community-supported agriculture, and supports school and prison systems. He’s even created an edible garden that employs 14 former inmates from San Quentin Prison.

Alexandra Campbell-Ferrari ’09
Political Science and Spanish

Alexandra turned her extracurriculars — working for student government and writing for the student newspaper, The Bucknellian — into a passionate career in political science and good government. She co-founded and serves as executive director of the Center for Water Security and Cooperation in Washington, D.C., where she’s led several projects, which include building a database of African water laws and creating a collaborative drought-resilience initiative between the United States and Spain.
Build the skills THAT OPEN OPPORTUNITIES

The best way to discover if a particular field or industry is for you is to dive in and test the waters. Take advantage of our resources to help you find career opportunities and gain experiences and skills that you can put to use.

Career Development Center (CDC)
The CDC offers alumni career services for a lifetime, holds two annual career fairs, and has programming for all class years and stages of career development.

Internships
Combine classroom learning and practical, hands-on experience in the working world. Get into all kinds of industries, make yourself marketable and create a network.

Externships
Shadow a Bucknell graduate, and see what a particular career path is all about. Exposure means more informed decision-making down the road.

My experience interning at the Bucknell Press showed employers that I had a serious interest in the field. My time there exposed me to the different elements of academic book publishing, and that gave me a strong foundation for moving forward post-graduation.”

Jennifer Weber ’13
ENGLISH
By sharing a space where artists, engineers and business leaders have the freedom to explore different paths.

A Bucknell education can’t be defined by one narrow philosophy. It’s found at the intersection of top-ranked arts, natural sciences, social sciences, humanities, engineering and management programs. Here, learning is an experience that takes place in and out of the classroom — and every space in between.

Led by professors and your own intuition, you’ll explore deeply the ideas and theories you’re passionate about, while delving into others more broadly. You’ll dive into opportunities not found elsewhere and develop a sense for who you truly are.

BY LIVING AND LEARNING TOGETHER with the greatest minds
SURROUND YOURSELF WITH fellow enthusiasts

In our Residential Colleges, you’ll find other first-year students passionate about celebrating the imagination, or seeing how science has saved the world, learning about grassroots activism, or understanding languages and cultures from other perspectives. Whatever you’re interested in — whichever direction you’re being pulled — there’s a Residential College for you.

These themed living-learning communities are tied to one of your first-semester classes and connect you with others interested in similar topics. You’ll live in the same residence hall, share ideas in class and travel off campus to visit sites related to your coursework. You’ll also get to interact closely with professors and older students who can become your mentors in those disciplines.

Don’t just follow a path
FIND YOUR WAY

The benefit of having more majors — and even more minors — than most traditional liberal arts universities is simple: choice. Whether you start with the destination in mind or figure it out once you get here, you’ll choose what you want to pursue. Then, you’ll pursue it. You can major, double-major or make your own major, finding the field of study that’s just right for you.

Get to know the people who’ve guided others on their way

In class, our professors are taking note — of who you are, where you excel and what you’re capable of. That’s what happens when you’re face to face with passionate teachers, scholars, researchers and mentors who have a knack for spotting talent and passion. Our professors aren’t here for a title or accolade — they’re here because they love teaching and seeing you succeed. And they’ll be there to support your studies, interests and choices, every day.

350+ FULL-TIME, TENURE-LINE FACULTY MEMBERS (WHO ALL TEACH UNDERGRADUATES)

96% of faculty have doctoral or other terminal degrees

9:1 STUDENT-FACULTY RATIO

FIND WHATEVER MOVES YOU, AND CHASE IT.

Ridhi Sahani ’18 had an idea of what she wanted to pursue, and supportive professors made the choice even clearer.

She applied to Bucknell because it was one of the few schools with strong engineering and dance programs. But it wasn’t until she sat in on a class with Professor Kelly Knox, theatre & dance, that Ridhi realized she could balance both of her passions.

Ridhi’s major in biomedical engineering and her role as an Arts Merit Scholar in dance have played perfectly to her fascination with how the human body moves. As an undergraduate research assistant for Professor Eric Kennedy, biomedical engineering, she’s working on biomechanics and injury prevention. Ridhi is also delighted to have such a close group of fellow biomed students and to see professors attend her performances.

Engineering is very structured. But when you approach a problem, you have to think from many different perspectives, which I tend to do, and I think that’s because of dance.”

RIDHI SAHANI ’18

BIOMEDICAL ENGINEERING
Welcome to where ideas intersect AND MOVE THE WORLD FORWARD.

At Bucknell, collaborative research and interdisciplinary study take place side by side in our academic centers and institutes. From our Humanities Center to our campus greenhouses, you’ll encounter the coursework, symposiums and special projects that point you to new theories and ways of seeing the world.

**CENTERS AND INSTITUTES**

The Humanities Center fosters excellence in teaching and scholarship across the humanities at Bucknell and beyond campus.

The Bucknell Center for Sustainability & the Environment enables interdisciplinary learning that advances our understanding of natural systems and human-nature relationships.

The Bucknell Institute for Public Policy supports social science research, teaching and learning on topics such as aging, labor migration, health care, education, political polling and taxation.

The Center for the Study of Race, Ethnicity & Gender supports faculty scholarship and interdisciplinary exchange in addition to student leadership and engagement in issues of race, ethnicity and gender.

The China Institute at Bucknell University promotes teaching, research and learning about China with cutting-edge scholarship, lectures and our annual China Town Hall, held in cooperation with the National Committee on United States-China Relations.

The Griot Institute for Africana Studies engages faculty and students in the interdisciplinary investigation of the cultures, histories, narratives, peoples, geographies and arts of Africa and the African diaspora.

Institute for Leadership in Technology & Management unites engineering, management and liberal arts students in an intensive summer program focused on globalization, ethics, communication, innovation and leadership.

The Stadler Center for Poetry fosters all appreciation for contemporary poetry among our community through programs and residencies for emerging and established poets and writers.

**A few notable research initiatives**

Professor Amal Kabalan

**Professor Amal Kabalan** powered the idea for solar backpacks, helping students in Guinea gain much-needed electricity and light for their studies.

Professor Mihai Banciu

Professor Mihai Banciu and his students are using statistical algorithms and outfitting doctors, nurses, patients and medical equipment with RFID chips to make sure that a local emergency department is saving as many lives as possible.

Professor Janice Mann

Professor Janice Mann and her undergraduate researchers are on an intellectual treasure hunt, sifting through the archives of a famous curator’s art and examining Westerners’ fascination with everything Eastern.
MAKE LASTING IMPRESSIONS AND LEAVE A LEGACY wherever you go

When you travel, the countries you explore, the people you meet and the perspective you gain shape your worldview. As a Bucknell student, however, you’ll have just as much impact on the places you go. We offer summer, semester and full-year programs around the globe, so you can choose where, when and what you’ll study.

UNCOVERING THE HISTORY OF ANCIENT GREECE

Bucknell students and faculty made more than memories when they embarked on their archaeological dig in Thebes.

Together, they helped unearth troves of ancient relics, including an antique red-figure vase as well as Byzantine glass jewelry, both of which are now on permanent display at the Archaeological Museum of Thebes.

The first joint Greek-American archaeological dig in the ancient city was led by Professors Kevin Daly and Stephanie Larson, classics & ancient Mediterranean studies. During the past six years, more than 75 Bucknell students spent their summers with the two professors, learning the physical and intellectual aspects of archaeology.

Larson, Daly and their students established the excavation from the ground up, forging strong ties with their Greek counterparts and creating an experience very few undergraduates are lucky enough to have.

As I was digging, I was learning history, archaeological technique, teamwork, modern Greek language, modern Greek culture and more. It allowed me to be a better student on campus at Bucknell, too. When I returned, I thought with a more open mind and was studying what I loved.”

Tours, France
Welcome to OUR COMMUNITY.

Every student begins their Bucknell experience the same way — by walking through the Christy Mathewson Memorial Gateway. From there on out, they’re a Bucknellian. That means being a part of an inclusive and supportive environment where you can feel confident finding your direction forward. It means joining a community dedicated to respect and dignity.

By opening up to the diverse experiences that point us in the right direction.

What that direction looks like is a little different for each of us. Because at Bucknell you take ownership of every day. You pursue your passions. That choice is what makes us all Bucknellians.

How we share those individual interests, however, is just as crucial. Direct encounters with people who hold diverse views and opinions helps us grow as individuals and make our campus a more vibrant, thoughtful place.

BY CONNECTING with different people, ideas and perspectives

Regardless of background, what brings us together at Bucknell is a shared desire for progress. It’s our experience with one another on and off campus that connects us all and gets us talking. And it’s how you engage with our open community that drives the conversation forward.

Where we’re going?
THAT’S WHY WE’RE HERE.

Sophomores, juniors and seniors with shared interests can apply to live in their own themed housing. Here are a few of our current Affinity Houses:

Umoja, from the Swahili word for “unity,” offers a space where people of all backgrounds can gather and feel like part of a family.

Martin House focuses on environmental health for the community, fostering relationships in Lewisburg that teach us all how we can sustain a healthier future for generations to come.

Entrepreneurship & Innovation is guided by a fascination with design and understanding how things work in order to improve them for the common good.

Fran’s House creates a safe place for people in the LGBTQ+ community to live and feel comfortable expressing themselves, while inviting the Bucknell community to learn and be good allies.

Leiser International House serves as a hub for international dialogue between students, and its members participate in intercultural issues that surround us all.

AFFINITY HOUSING: WHERE LIKE MINDS MEET

18
Take a CREATIVE DIRECTION

The arts at Bucknell allow you to create without inhibition and take you where you want to go. They let you explore new themes and live vicariously through someone else’s experiences. Our flourishing artistic community is more than an inspiration on campus; it’s imagination and ingenuity at work.

EXHIBITION AND PERFORMANCE SPACES

- **The Samek Art Museum** creates meaningful encounters between artists, students, scholars, the public and works of art.
- **The Campus Theatre**, one of the nation’s few remaining single-screen art deco movie houses, is dedicated to the promotion of the art of cinema.
- **Downtown Gallery** on Market Street hosts exhibitions and programs that are free and open to the public.
- **Rooke Recital Hall** presents approximately 100 concerts, recitals, master classes and lectures each year.

**Weis Center for the Performing Arts** features 35 annual events, including Americana, folk, jazz, world music, dance and much more.

**3RD most amazing COLLEGE AND UNIVERSITY PERFORMING ARTS CENTER in the United States** (Best Value Colleges 2014)
At Bucknell, there’s always time for firsts or for exploring those things you already love. So go ahead — push yourself to try something out of your comfort zone, or keep after your passion. We have more than 200 arts, service, academic, athletic, cultural and Greek groups, where you’ll meet friends who share your interests and make the kinds of connections that just might lead you to a new discovery.

Health & Wellness
The Kenneth Langone Athletic & Recreation Center (KLARC) includes our state-of-the-art athletic facilities where you can maintain your active lifestyle.

The KLARC houses:
• 70+ CARDIOVASCULAR MACHINES, INCLUDING ELLIPTICALS, CROSS-TRAINERS, STATIONARY BIKES, TREKKMILLS AND INDOOR ROWERS
• MACHINE WEIGHTS AND FREE WEIGHTS
• 7 RACQUETBALL COURTS AND 3 SQUASH COURTS
• 6-LANE 200-METER INDOOR TRACK
• 3 COURTS FOR BASKETBALL, VOLLEYBALL AND TENNIS
• 50-METER-BY-25-YARD OLYMPIC-CLASS POOL

Bucknell Bison are that rare breed of scholar-athlete who excel no matter where they go. They take pride in being fierce competitors, leading in the classroom and out on the field. Dedicated coaches, staff and fans give them momentum to win.

NO. 2 SCHOOL
IN THE NATION FOR STUDENT-ATHLETE GRADUATION RATES FOUR YEARS IN A ROW
Each of us FINDS OUR WAY HERE

It all starts on a campus that never stops inspiring. From your first visit to your long, proud walk at Commencement to every time you retrace your steps back to Bucknell, you’ll experience a beauty and tradition that runs deep. The iconic Malesardi quad stands at the center of campus surrounded by the gorgeous architecture, exceptional facilities and meticulously kept grounds that make Bucknell home.

By going to the one destination that leads you to every other.

Bucknell is located in Lewisburg, Pa., an ideal location for higher learning. But this place isn’t just a four-year stop along the way. It’s where everything you want to achieve begins. It’s the point from which you’ll plan and prepare for your next venture — and every one after that. It’s where you’ll trace back every skill you gained, every mission you accomplished and every connection you built. Because this is where you learn to invest in the community and make it a better place to live, learn and work.

BY COMING TO THE ONE PLACE WHERE EVERYTHING CONNECTS
Get involved in Lewisburg

Within this historic town, with its beautifully preserved Victorian homes and thriving restaurants, art galleries and boutiques, is a vibrant, forward-thinking community. Here, you’ll have the opportunity to work closely and develop relationships with Lewisburg’s residents, businesses and organizations to build your own experience.

Venture out into the Susquehanna Valley

Our region isn’t just the backdrop to discovery or beautiful scenery for examination. It’s home to state parks and acres upon acres of state forest. For the adventurous, that’s a calling. For the more inquisitive, it’s an opportunity to explore geology and paleontology — or gaze up at a clear, starry night and try to make sense of it all. Regardless, it’s cause to get out and experience the breadth of outdoor beauty and adventure our area offers.

Wi-Fi for a good cause: food

Working with Professor Philip Asare, electrical & computer engineering, several Brazilian exchange students researched and built a solar-powered hotspot for the Lewisburg Community Garden and helped streamline data management for its hot-meal program and food banks.

3 HOURS FROM NEW YORK CITY, PHILADELPHIA, WASHINGTON, D.C., AND BALTIMORE

79% of seniors perform community service or volunteer work

None of us had worked with the tools we used to do this project — we basically had to find our way through it. In the lab, you’re told what you have to do and how to do it. Here, we set our own goals.”

Felipe Mariano de Freitas

Felipe Mariano de Freitas
