

Grills and open flame cooking devices

Due to continued discussions regarding grill usage at Bucknell Fraternity Houses, the following are the safety and business decisions regarding their storage and use:

- In all circumstances, grills cannot be used within 25 feet from the house. This means that permanent or large commercial grills must be placed on the perimeter of the property away from the building, power lines, and overhanging trees.
- All fuel agents must be stored in the applicable storage shed or in an area approved through Bucknell's EHS Department.
